Quick and easy setup

Multiprocess capabilities allow for MIG, flux-cored, DC TIG and DC stick welding.

Intuitive color LCD user interface makes it quick and easy to adjust parameters.

Auto-Set™ Elite can be used on multiple materials and multiple processes with the ability to finetune your settings. Easy to set up and use.

Multi-voltage plug (MVP™) allows connection to common 120- and 240-volt power receptacles without the use of any tools—choose the plug that fits the receptacle and connect it to the power cord.

Angled cast-aluminum drive system with Quick Select™ drive roll for smooth feeding and quick wire changes.

Smooth-Start™ for consistently smooth, spatter-free MIG starts.

Auto Spool Gun Detect™ automatically detects when a MIG gun or spool gun is connected, eliminating the need for a switch.

Fan-On-Demand™ cooling system only operates when needed, reducing noise, energy use and the amount of contaminants pulled through the machine.

Thermal overload protection automatically shuts down the power source if airflow through the unit is blocked or the duty cycle is exceeded.
